TAGS: SNAR AFIN KCRM KJUS BU

SUBJECT: BULGARIA: REVISED 2008 INL END USE REPORT

REF: A) SECSTATE 127211

B) SOFIA 000666

¶1. The following is Embassy Sofia's revised 2008 End Use Monitoring Report, keyed to items listed in Reftel B.

¶A. Inventory Management

End Use Monitoring Report Coordinator: Joslyn Mack-Wilson, Political Officer, 359 2 937 5276, mack-wilsonj@tstate.gov.

¶B. Inventory System: Post maintains EUM cables listing donated material and its status.

¶C. Staff Member Responsibilities: Rule of Law Specialist, Radostina Mihalkova, completes end use reporting audits, along with PolOff.

¶D. Number of donated items subject to inspection:

101 items were donated to the following entities:

- (50) National Forensic Institute
- (27) Ministry of Interior Academy
- (13) Directorate for Organized Crime
- (05) Ministry of Justice
- (04) Local Police Plovdiv
- (01) Interior Ministry Psychological Institute
- (01) Regional Appellate Prosecutors Office

¶E. Secondary monitoring methods:

Post received reports and discussed the status of INL equipment with host government officials in January 2009 with Ministry of Justice Directorate for Organized Crime and the Interior Ministry Psychological Institute. In May 2009, we held further discussions with the local police in Plovdiv, and the Regional Appellate Prosecutors Office. All equipment in these locations were monitored using secondary methods.

Post conducted on-site inspections of the most valuable INL donated equipment located at the National Forensics Institute (NFI) and the Interior Ministry Academy. The staff was cooperative and assisted

fully in the inspection process. This accounted for 57 out of 101 items donated to the Bulgarian government, approximately 56 percent of the equipment. See justification in paragraphs G and H for the recommended retirement of a significant portion of items covered by this report.

IF. Impact on 2008 INL Program:

The equipment was donated to the Bulgarian government under prior year INL programs, but remains valuable to the operations of the Bulgarian law enforcement authorities.

IG. Problems:

Post has updated its listing of donated items based on additional information received from INL about past donations. Post recommends that on-site inspections be conducted only at the National Forensic Institute and the Interior Ministry Academy, where the newest and most valuable equipment is maintained. On-site inspections are not recommended at the other locations which have lesser value and more outdated donated items. Post continues to advocate for increased investment in equipment for Bulgarian law enforcement authorities, but recognizes the current political and economic constraints. With pending elections, such investments will likely be the responsibility of the next government.

IH. Revised Inventory Report:

Computer Equipment at the National Forensics Institute:

This equipment was donated to the Institute in 2000 and is in use beyond its anticipated useful life. Post is retiring the following equipment from its inventory list:

- 1-12. HP Brio PC with 17-inch HP monitor (12)
